App Guide

- Apps you can get on your phone or tablet.

- My Stitch Monitor keeps track of the progress of your embroidery project.

- **My Design Snap** makes it easy to send pics from your mobile device to your XP2 wirelessly.

- **In the App:**
- Tools icon: tap to verify you are connected to your XP2.
- Under My Design Center, tap "Select image for pattern editing".
- Choose the image you want to transfer.
- Tap "send to the machine".

- **Brother Design Database Transfer**

- In the internet search bar of your computer type in "Brother Design Database Transfer".
- Read the information and tap the box that will take you to the download page.
- Follow the directions from there to download.

- **To use:**
- Find the correct file folder on the left.
- Choose the design.
- Tap the down arrow.
- Tap the icon near the bottom left to send to your XP2.
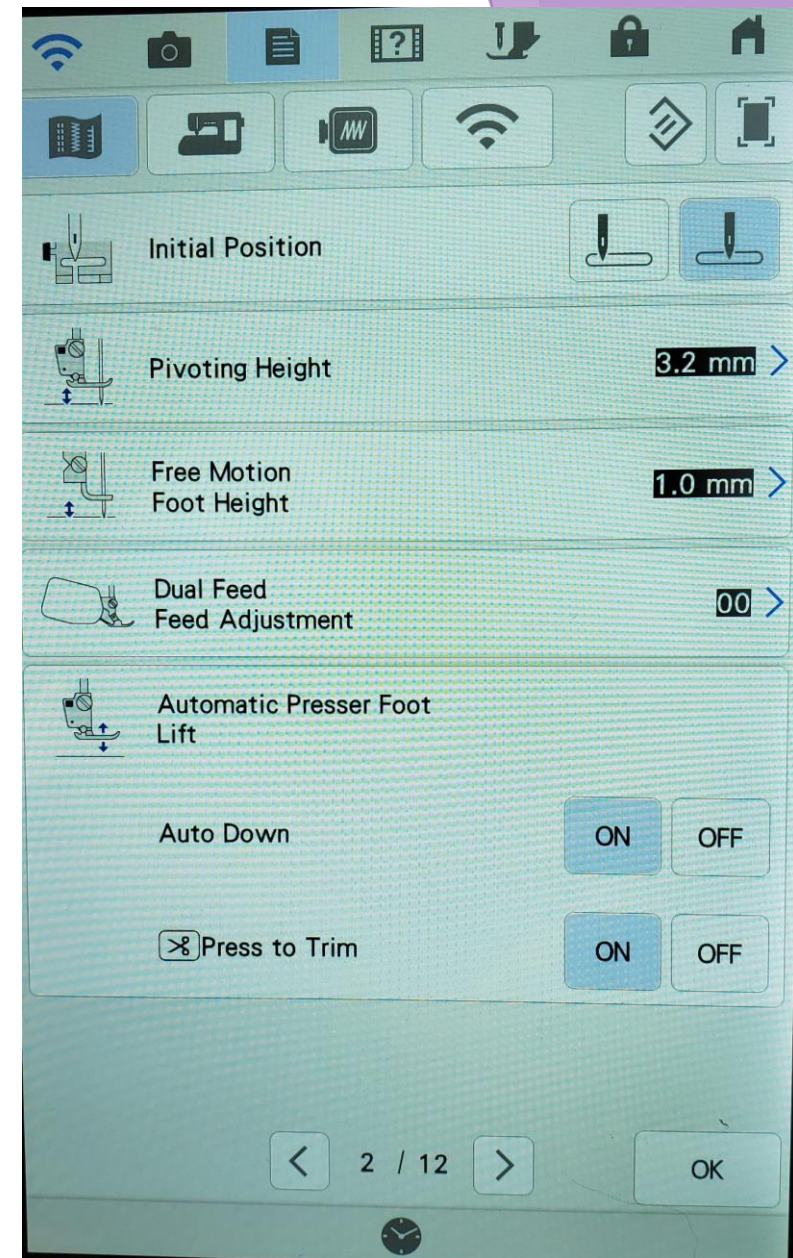

Machine Settings Screen-

- **Automatic Fabric Sensor System-**the machine will automatically detect the thickness of the fabric and adjust to ensure the fabric is fed smoothly

- **Adjustments and Presser Foot settings** – best to leave at default settings

- **Automatic Fabric Sensor System** - on
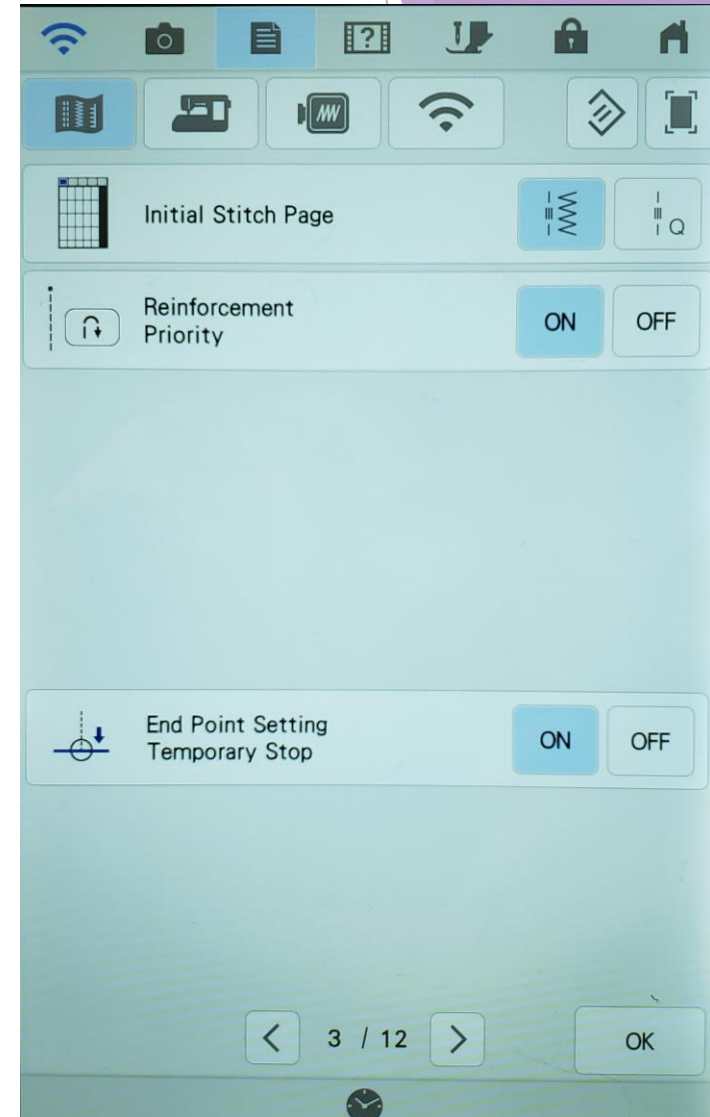

Machine Settings Screen-

- **Initial Position**-choose between **stitch 1-01** straight stitch, left or **stitch 1-03 straight stitch,** center as the utility stitch that is automatically selected when the machine is turned on

- **Pivoting Height & Free Motion Foot Height:** choose the height at which you prefer your presser foot when pivoting or when using the free motion foot. Default settings are highlighted in black.

- **Automatic Presser Foot Lift** - All functions must be set to ON then the presser foot will go down automatically when the foot control (or go button) is pressed. It will also raise when sewing is done and after a thread cut.
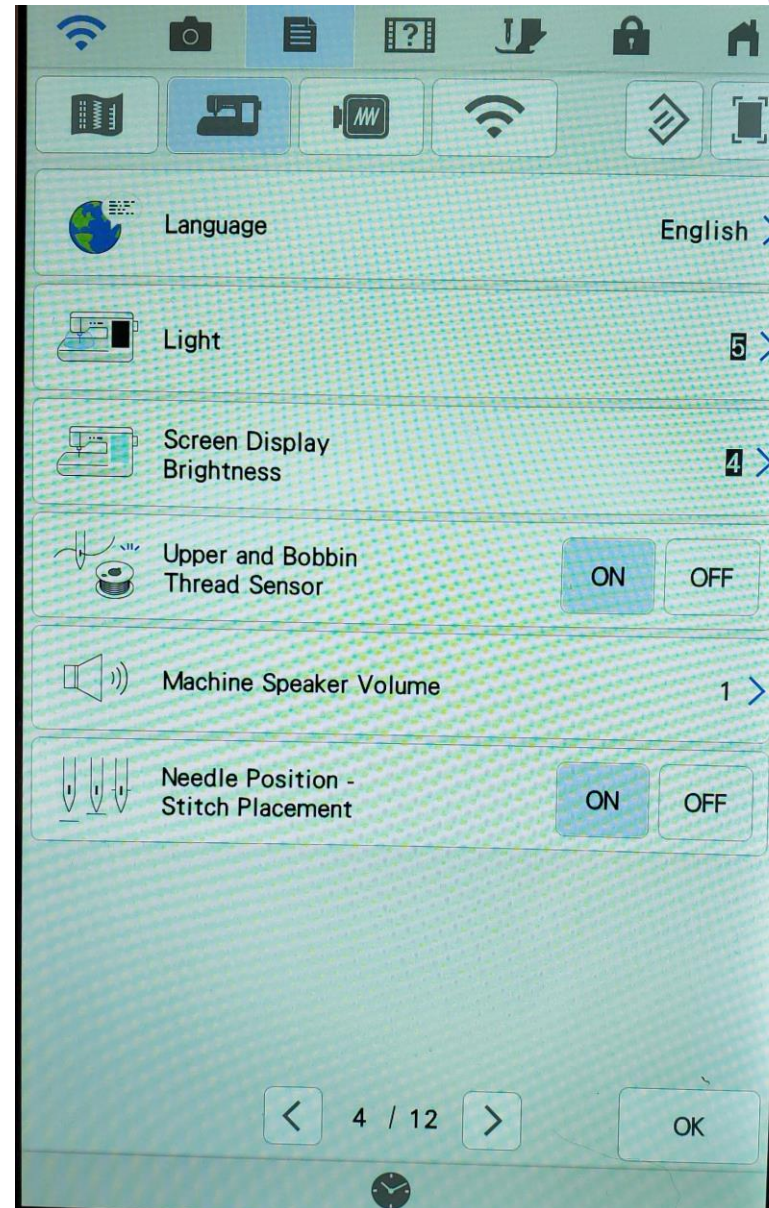

Sewing Settings-

- **Initial Stitch Page-**choose the selection screen that appears when Sewing is pressed on the Home Screen-Utility Stitch or Quilt Stitch
